Toxics Appdx Issue Statement.docx  
Toxics Comments summary.docx  
Toxins Merged NMFS&FWS Comments.docx

Erin,

Here is FWS' comments on the toxics appendix to give you the idea of how we are trying to form "durable comments" on the EA methods as opposed to editorial or grammar-related comments. All of this suffers from high speeds and fast lane changes ;)

Thanks again for your time on working on this with me. It was very helpful.

Leanna

Subject Toxin appdx draft final comments

Folks --

for your files, here is what we have sent forward to Federico to provide to ICF for the Toxin appendix of Chapter 5. Apologies to those to whom I may have sent multiple copies.

The "Issues Statement" is the model for what we're trying to develop at the BDFWO for future comments. Perhaps it would help your preparation of comments for current and future reviews if you have a chance to look it over.

Thanks for your efforts thus far.

Steve
